InDomo® and StairFit®
Homelifts
Why a home lift?

Our home lifts are designed to solve the needs of vertical mobility and to remove architectural barriers in all environments, both private and public.

They represent the ideal solution to overcome the stairs and rediscover the pleasure of moving freely in every moment of the day.

They can be installed both inside and outside the building in special metal structures or between the walls of the house.

They ensure a high level of ride comfort, great reliability and total safety, for example guaranteed by the automatic emergency lowering system in the event of a power failure.

They can be installed in new buildings but fit perfectly every existing environments, increasing their value.

Safety
Thanks to the wide range of specific devices you can move every day around the house without worries.

Comfort
It can be operated by pressing the button, both in the cabin and on the landings. Choosing the version with automatic sliding or folding doors in the car, you will not have to hold the button pressed during the entire travel.

Style
Decorate the space in motion by choosing the finishes that best suit your environments and satisfy your taste as you would do for any furnishing accessory. Our renewed range of cabins, Smart - Idea - Style and Opera, best represents the expression of MADE IN ITALY.

Reduced spaces
StairFit is our compact model created to be installed in limited spaces and ideal for staircases with particularly reduced width. Each lift is made to measure in order to take advantage of every single centimetre available.
Indoor and outdoor homelifts

InDomo can be installed both inside and outside the building to ensure maximum accessibility at all levels. StairFit is thought to be positioned in an indoor stairwell.

If you do not have specific shaft you can connect the lift directly to the balcony or using existing windows modified to obtain the necessary entrances.

Small elevators for private homes and public environments

Our products find their natural connotation mainly in private homes to help you live fully your environments.

Nevertheless, they are the ideal solution to overcome architectural barriers in public environments like schools, shops, restaurants, offices and can guarantee the right solution to all needs.
**Masonry shaft or metallic structure**

The lift travels inside a shaft to guarantee the maximum safety, according to the law. The shaft can be obtained inside the house making it in masonry or concrete.

Alternatively we can provide a metal structure designed for indoor or outdoor (since it is weather-proof), certified according to the anti-seismic rules. The structure has multiple finishes and can be completely glazed to ensure good aesthetic result, lightness and visibility.

**Swing doors or automatic doors**

As standard, InDomo and StairFit lifting platforms are offered with swing glazed doors that guarantee maximum visibility and passive safety.

They can also be equipped with automatic sliding doors or with internal folding doors and external automatic swing doors (myDOMO) which allow automatic control avoiding to keep the button pressed during the entire travel.
With its up-to-date, minimalist and yet affordable design, this is LiftingItalia best-selling cabin, now available with new eye-catching skinplate texture finishes.

**InDomo homelift cabin**

Full height COP in scotch brite ST/ST
Bright, fresh and available in a wide colour range, this cabin boasts a plain and youthful design that brings sparkle to its surroundings. IDEA is the cabin designed specifically for panoramic lifts and offers the possibility of having up to three glass walls.
Cabin

STYLE

Timeless style

The material combinations are designed to exalt the enduring look of the stainless steel, which enhance both classic and modern environments.

InDomo

**STRENGTH AND RELIABILITY**
InDomo means realiability and safety. Thanks to the hydraulic traction, to the solid structure and to the safety devices (blackout emergency descent, automatic rescue call and much more) you will never have to fear of being stuck in the cabin.

**TOP COMFORT AT THE BEST PRICE**
InDomo is the mini-lift for those who don’t accept compromises. Top comfort and quietness, smooth starts and stops, great lighting and best technologies create the best travel experience in the category.

**LIVING SPACE**
The new range shows a completely renewed line of cabins, with a clean and essential design which will give your house an unmistakable touch of elegance.

**StairFit**

**COMFORT IN REDUCED SPACES**
We created StairFit for very narrow staircases but keeping a great cabin habitability and comfort thanks to the new “extra breathing system” which includes: full height mirror (C side), panoramic side walls, fan and scotch-brite stainless steel finishing.

**CUSTOM DIMENSION TO THE MILLIMETRES**
We produce every installation singularly, so that we can take advantage of every inch of available space. STAIRlift was designed to offer the best possible comfort in case of a refurbishment or building upgrades where available spaces are particularly small.

**SAFETY AND RELIABILITY**
Even in reduced spaces STAIRlift offers the same level of performance and safety features of a standard mini-lift, so that you can always be relaxed.

Who we are

LiftingItalia is a young company established by professionals with long experience in the vertical transport sector.

LiftingItalia is specialized in the design and production of home and platform lifts to overcome differences in height up to 20 meters.

Our products are sold in over 30 countries worldwide!

Made in Italy

What makes us unique is the Italian style and the attention to quality which comes from our history as a manufacturing company.

Functional and comfortable, LiftingItalia’s homelifts allow you to move easily, in perfect autonomy and with the charm that distinguishes the Italian style.

LiftingItalia and AreaLift

The group consists of two young and dynamic companies that work in perfect synergy completing each other.

LiftingItalia - Established in 2003, is the parent company and today is specialized in the production of high quality homelifts.

AreaLift - Established in 2006, is a company specialized in accessibility solutions and vertical mobility.
